

# DEATH2DATA

*Privacy tools for people who want to stop being the product.*

---

**Did you know that every search you make, every site you visit, and every message you send is being collected and sold?**

## **Here's what happens when you use the internet:**

Companies like Google, Facebook, and now AI companies like OpenAI track everything you do online. They build detailed profiles about you—your health concerns, your finances, your relationships, your politics—and sell that information to advertisers and data brokers.

**Your personal information is worth money. You're just not the one getting paid.**

## **Death2Data is different.**

We built tools that work WITHOUT collecting your data. When you search, we don't save it. When you write, it stays on YOUR device. When you use our AI tools, your questions aren't logged or sold.

### **What You Get:**

---

- Private search (no tracking)
- Private notebook (stored locally)
- Private AI assistant
- Tools to see who's tracking you
- No ads. No tracking. No BS.

### **What We Don't Do:**

---

- We don't collect your data
- We don't sell your information
- We don't build profiles on you
- We don't share with "partners"
- We don't have investor pressure
