

# DEATH2DATA

*Your data is yours. Keep it that way.*

## THE PROBLEM

Every time you use the internet, companies are:

- Tracking everything you search, click, and read
- Selling your personal information to advertisers
- Training AI on your content without permission
- Building profiles that know more about you than your family

**Your data is worth money. You're just not the one getting paid.**

## THE SOLUTION

Death2Data is a set of privacy-first tools that let you use the internet without being tracked. We don't collect your data. We don't sell your data. **We don't have your data.**

## WHAT YOU GET

- **Private Search** — Search without Google knowing what you're looking for
- **Private Notebook** — Notes with AI help, stored on YOUR device only
- **Private AI** — Use AI tools without your questions being logged
- **Bot Detection** — See when AI crawlers are hitting your websites

## HOW WE'RE DIFFERENT

| BIG TECH TAKES:        | D2D KEEPS NOTHING:    |
|------------------------|-----------------------|
| X Your search history  | ✓ No search history   |
| X Your location data   | ✓ No tracking cookies |
| X Your browsing habits | ✓ No user profiles    |
| X Your personal info   | ✓ No data collection  |
| X Everything, forever  | ✓ Your data = yours   |

**\$1/month**

No contracts. Cancel anytime. No tricks.
